miraDry today!

***In the European Union (EU), the miraDry System is intended for use by health care professionals for treatment of primary axillary hyperhidrosis (excessive underarm sweat) in adults.**

****After local anesthesia**

References: 1. Data on file. miraDry, Inc 2. Lupin M, Hong HC, O'Shaughnessy KF. Long-term efficacy and quality of life assessment for treatment of axillary hyperhidrosis with a microwave device. *Dermatol Surg.* 2014;40(7):805-807.

The miraDry system is FDA-cleared for the treatment of primary axillary hyperhidrosis (excessive underarm sweat) and the permanent removal of underarm hair. It also may reduce underarm odor.

You should not have the miraDry treatment if you have a heart pacemaker or other electronic device implant, need supplemental oxygen or have known resistance to or history of intolerance to local anesthesia including lidocaine and epinephrine. The most common side effects include swelling, discomfort or pain, redness, bruising, bumps and altered sensation in the treated area. Some side effects may last a few days to a few weeks. Others can last from one to several months following treatment. Patient results and experience may vary.

COMFORTABLE CONFIDENT CLEAN

THE MOST ADVANCED SWEAT AND
ODOR TREATMENT ON THE MARKET.

Why Stress Over Underarm Sweat and Odor If You Don't Have To?

Have you ever felt self-conscious about your underarm sweat and odor?

Do you avoid social activities or work opportunities because you feel embarrassed about your sweat stains and underarm odor?

Have you ever wished underarm sweat and odor were something you did not have to worry about?

Have you ever tried any of the following to mask underarm sweat and odor?

Reapply deodorant or antiperspirant more than once per day

Use sweat shields or patches to protect your clothes

Changing clothes multiple times per day

Showering more than one time per day

If you answered yes to one or more of these questions, miraDry may be right for you.

What is miraDry?

The miraDry treatment is a procedure performed by a trained medical professional, in as little as one hour.**

3 Steps to Treating Sweat and Odor

NUMB IT

Local anesthesia is administered to assure maximum comfort during the treatment.

MARK IT

A temporary tattoo is used to mark skin in preparation for treatment.

TREAT IT

The area is treated with miraDry, eliminating sweat and odor glands while reducing hair in the underarm.

The Benefits of miraDry

miraDry is the first and only FDA-cleared procedure for the reduction of underarm sweat and odor.

		
How It Works	Uses thermal energy to permanently destroy sweat and odor glands	Temporarily blocks the nerve signals responsible for sweating
